

## Update from Glendale (Chris Thompson)

---

List received 2 June 2011:

### Work done:

- The pond pumps have at last been fixed (the latest problem was with the timer)
- The WC blockage has been cleared and the door has been varnished
- The drinking fountain in the upper park is now working properly, with good pressure
- The lines in the tennis courts have been repainted, though tennis players might like to check if they are accurate enough

### Work scheduled:

- Handrails in the toilet are due to be replaced, as they have rusted
- The drinking fountain in the lower park has sprung an internal leak and will be fixed as soon as the affected part is received from the manufacturers
